EDUCATION

Rajalakshmi Engineering College

Chennai, India

B.E. in Computer Science and Engineering (Cyber Security)

Expected Graduation May 2028

- CGPA: 8.88/10
- Coursework: Data Structures and Algorithms, Object Oriented Programming in Java, Computer Networks, Database Management Systems, Cryptography

Velammal Vidhyashram

Chennai, India

Higher Secondary Education (Class XII)

February 2023 – June 2024

- Stream: Mathematics, Physics, Chemistry, Computer Science
- Board: CBSE Percentage: 84.4%

EXPERIENCE

IEEE Board Member – Technical Team

October 2025 – Present

IEEE Student Branch, Rajalakshmi Engineering College

Chennai, India

- Collaborated with a 5+ member technical team to maintain and improve the IEEE student branch website and digital platforms, contributing to 3+ successful event launches.
- Developed responsive frontend components using React and Vite.js, reducing page load time by 20% through optimized assets and modular component design.
- Actively participated in board-level meetings and cross-team discussions with department managers and faculty coordinators, strengthening professional communication across 10+ organized events.

Software Development Intern – ASHOK LEYLAND

June 2026 – July 2026

Ashok Leyland

Chennai, India

- Engineered interactive UI components for an internal employee management platform using React (TSX) and Sassy CSS, improving task navigation efficiency by 35% across 500+ daily active users.
- Built reusable MUI-based animation components that reduced frontend development time by 40% and enhanced visual consistency across 10+ modules in the enterprise software suite.
- Collaborated directly with senior developers and product managers in agile sprint meetings, translating business requirements into pixel-perfect UI features and delivering 3+ components per sprint cycle.

PROJECTS

FleetSensor – Predictive Fault Intelligence | *React (TSX), SCSS, MUI, Node.js, SupaBase(SQL)*

- Built a predictive diagnostics platform correlating pre-fault engine telemetry (RPM, temp, load, speed) across 200+ fleet vehicles, shifting maintenance from reactive guesswork to pattern-driven root cause analysis.
- Generated per-DTC sensor fingerprint cards with radar and bar chart visualizations distinguishing fault variants across 40+ vehicle histories, cutting misdiagnosis by ~65% and repeat repairs by ~70%.
- Architected 3-tier RBAC (Admin, Manager, Worker) with deny-by-default middleware on every API route, ensuring production-grade security across all data endpoints.

THINKIT – Dyslexia Support Learning Platform | *HTML, CSS, JavaScript*

- Built an accessibility focused web application to assist dyslexic learners through interactive reading tools.
- Implemented phonetic segmentation, quizzes, worksheets and typing practice modules.
- Integrated Web Speech API for text-to-speech support and HTML5 Audio API for feedback.
- Used JavaScript DOM manipulation and LocalStorage to track user progress and store data.

XYNTRA Hackathon Landing Platform – IEEE | *React, Vite, Tailwind CSS, Node.js*

- Developed a responsive hackathon platform using React and Vite with modular components, Tailwind CSS styling, and interactive animations using GSAP and Framer Motion.
- Designed an interactive event interface with countdown timers and animations that improved user engagement and reduced navigation time by ~30%.
- Integrated participant registration through the Unstop platform and implemented secure payment handling using Razorpay APIs with backend support for event registrations.

TECHNICAL SKILLS

Languages: Java (Primary), Python, C, JavaScript, HTML/CSS, SQL (MySQL)

Core CS: Data Structures and Algorithms (Arrays, Strings, Hash Maps), Object-Oriented Programming in Java

Frameworks: React, Vite.js

Developer Tools: Git, GitHub, VS Code, IntelliJ, Linux, Linux CLI, Netlify

Libraries: Java Standard Library, GSAP, Vanta.js

Coding Practice: Solved 120+ DSA problems on [LeetCode](#) and 100+ problems on [GeeksForGeeks](#) using Java
